

## Download Your Library Card to a Mobile App

You can now add your library card to a smartphone app for added convenience when visiting the library. Simply add your card to the app of your choice and never forget your library card again!

Not sure which app to use? For your convenience, The Hayner Public Library District is listed as a registered "store" with Key Ring (a store rewards card company). To use the Key Ring app, please follow these instructions:

1. Download the Key Ring app for your phone
2. Open the Key Ring app
3. Touch the plus sign (+) button at the top of the screen
4. Touch the *Add Card* icon
5. Touch the *Allow Camera* icon (you will need to do this to scan your library card barcode)
6. Scan the barcode on your library card
7. Compare the barcode number on the back of your card to the barcode number now listed on your screen to be sure the card scanned properly.
8. Touch *Select a Store* and select "The Hayner Public Library District" from the list of merchants (you can scroll or search)
9. Be sure that the *Card Has Barcode* option is selected (turned on)
10. Touch *Next* in the upper right-hand corner of the screen
11. Touch *Done* in the upper right-hand corner of the screen
12. **(Optional)** Take pictures of the front and back of your card to store in the app. Or you can choose to skip this step by touching *Skip for Now*.
13. Touch *Add Another Card* or *No More Cards* to complete the process
14. **(Optional)** You will be asked to create a Key Ring account. If you wish to do so, touch the *Create Account* icon. If you wish to skip this step, touch the *I'll Risk It* icon. Note: Creating an account will save your card on the Key Ring app server. You will be able to access the card again should you accidentally delete the app, your barcode, or lose your phone. Not creating an account will still allow you to use the app; however, your information will not be stored on their server. This means you will not be able to retrieve it should something happen to the app or your phone. You will have to add the barcode again. Creating an account will require entering your email address and other information. Again, creating an account is your own personal preference. The app will work either way.

**Note: Photos of library cards are not valid. Barcode scanners are not capable of reading photo images of barcodes; they are programmed to scan a digitized barcode. Therefore, your library card must be added to an app in order for it to be used digitally at our Circulation Desks.**
